Angle Examples with SimBraille

1. Angle B is written
   \( \angle B \)
   \[ \] 

2. Angle one is written
   \( \angle 1 \)
   \[ \] 

3. Angle ABC is written
   \( \angle ABC \)
   \[ \] 

4. The measure of angle DEF equals ninety degrees is written
   \( m\angle DEF = 90^\circ \)
   \[ \] 

5. The measure of angle two equals thirty degrees is written
   \( m\angle 2 = 30^\circ \)
   \[ \] 

6. Angle J is congruent to angle K is written
   \( \angle J \cong \angle K \)
   \[ \]
7. The measure of angle A plus the measure of angle B equals one hundred eighty degrees is written

$$m\angle A + m\angle B = 180^\circ$$

8. Angle MNO is congruent to angle ONP is written

$$\angle MNO \cong \angle ONP$$
