Antiderivative Samples with SimBraille

1. Capital f of x equals nine x minus four is written

   $F(x)=9x-4$

2. Capital f of b minus capital f of a is written

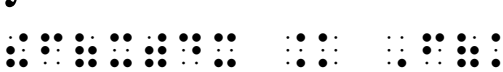
   $F(b)-F(a)$

3. Capital g of four minus capital g of negative three is written

   $G(4)-G(-3)$

4. The integral of f of x dx equals capital f of x plus capital c is written

   $\int f(x)dx=F(x)+C$

5. The integral from a to b of f of x dx equals capital f of b minus capital f of a is written
   $\int_a^b f(x)dx=F(b)-F(a)$
