

Number Lines

Transcriber's Notes

Mathematical content is transcribed according to "The Nemeth Braille Code for Mathematics and Science Notation, 1972 Revision," 2007-2016 updates, and the "Guidance for Transcription Using the Nemeth Code within UEB Contexts." Number lines are produced according to the "Guidelines and Standards for Tactile Graphics 2010."

The print text is printed in blocked paragraphs, but indented paragraphs are used throughout the braille document. In addition, the symbols are listed in order of their use in the lesson rather than braille order on the special symbols document.
