

Graphing Compound Inequalities

Game 2 Matching Game

Match the inequalities on the first page to each of the inequalities graphed on the remaining pages to make a word. In a new document, braille the letter that goes with the answer to each problem in order to spell out the word. Letters may be used more than once. *Note: Students should not use the grade 1 symbol indicator when writing their answer since they will be creating a word in uncontracted braille.*

Letter	Inequality
c	$x < -1$ or $x > 0$
e	$-100 < x \leq 300$
u	$x \leq 1.5$ or $x \geq 2.5$
s	$0 \leq x < 2$
